

# BIOLOGY COMPUTER LABORATORY

TO: MODULAR BIOLOGY STUDENTS

The General Biology programs listed below can be accessed via PC's 1-10 located in the Biology Computer Laboratory (Room – 249).

## Current Biology Programs:

Biology: The Study of Life	Inside the Cell
*The Biosphere	Investigating Heredity
Cellular Respiration	*Human Impact on Environment
DNA: The Molecule of Life	Mendel's Principles of Heredity
Fungi	Photosynthesis
From DNA to Protein	*Population Ecology
*Food Chains 7 Webs	Roots & Stems
Genetic Engineering	The Vertebrates

## General Directions:

1. Turn on master power switch (located on the front panel of the surge protector).  
\*Check to see that the monitor is turned on.
2. Push in the oval-shaped PC start button (located to the right of the middle of the front PC panel).  
Wait a few moments until the Novell Client Login icon appears on the monitor & then click on OK.  
(Do not type in a password.)
3. Double click on the Cyber-Ed Network Menu Icon & the list of available Cyber-Ed Biology programs will appear.
4. Click on the program that you wish to view & click on start & then click on continue (at bottom of screen).
5. Click on start & the main menu appears on the screen.  
This would be a good time to review the Interactive Biology Main Menu description on the next page.
6. Select a menu item & then select presentation mode & presentation location.
7. To exit the program at anytime (& exit to the main menu) choose quit & then choose cancel.
8. To correctly shut down the PC.
  - √ Choose start (bottom left of screen)
  - √ Choose shut down
  - √ Choose yes
9. After PC shuts down, turn off master power switch on surge protector.  
Headphones: Volume control is found on the headphone cord.
