Enhancing the Learning Environment and Campus Safety

The facility master plan calls for $2.37 million in miscellaneous projects that will improve the learning environment and make health and safety enhancements positively affecting the 5,000-plus students and 450 employees on campus.

These projects will:

- Increase and improve classroom technology applications
- Improve the student and community way-finding with new and additional uniform campus signage
- Increase energy efficiency with much-needed HVAC and electrical improvements
- Add storm water drainage to protect existing college buildings
