2.8 Mechanical Cont.

Notes:

1	The air handling units are original and should be replaced
2	There are problems with the domestic hot water recirculation resulting in long delays before hw reaches the fixture.
3	There are hydronic flow and balance issues
4	Heating hot water is provided from the boilers in the Technology Building
5	Chilled water is provided by a Trane chiller (RTHC 1C1F - 2001) with a

Evapco cooling tower (AT 19-79 - 2001)

3.0 Recommendations

This section is intended to document and quantify recommended items / improvements noted during the building assessment. This section is included as a means of quantifying improvement cost through a conceptual estimate. These costs are placeholders of potential value to a recommended item. They only attempt to give an estimated dollar value to a recommended item. This section is designed as a tool to demonstrate the potential costs of recommendations / improvements and provide a comparison based on these costs to other buildings in the district. These costs broken down into recommended time lines based on a 5 year, 10 year and 15 year time table.
