2. **The College will** prepare students with the skills necessary to enter and/or advance in the technologically sophisticated local and global workplace.

3. **The College will prepare** students will to meet the unique educational, cultural, and societal needs in the community.

4. **The College will** provide classes and/or programs that allow students to achieve their specific educational goals.

- **Financial Stability** – develop Ends policies around fiscal performance/expectations.
  
  Upon review of other college’s policies, it was discovered they typically do not have specific Ends Policies, but rather use the Executive Limitation Policies. Part of the reporting process includes Administration reporting their performance to the Board in meeting the End Policies and their fulfillment of meeting the obligations under the Administrative Restrictions. The MCC Board of Trustees decided to adopt this same process for the first year, with Administration reporting back on limitations. The Board will then evaluate whether further policies are required. Dr. Nesbary also circulated some Executive Limitations from a Montana college, which the Board will review and compare to MCC’s executive limitations, to determine if there is anything additional that needs to be added.

- **Community Impact**
  
  - **Health and Wellness** – The Board asked Administration to think about End Policies dealing with the health and wellness of the community and how MCC’s Health & Wellness facilities will work to meet those End Policies.

- **Educational Level of the Community**

D. **Future Agenda Items** – If Trustees are interested in specific issues, they may forward them to the Chair or Vice Chair.

E. **Board Evaluation** – the Board has been practicing under policy governance for six months and the consensus is they are still learning, are making good progress, and like the pace.
