Computer networks are critical parts of almost every organization. Network and computer systems technicians with skills in CISCO technologies are responsible for the day-to-day operation of these networks.

It’s your future.

Offered at MCC

The Computer Networking CISCO Certificate program is a gateway to entry-level networking jobs and IT careers. CISCO Certified Network Associate (CCNA) Routing and Switching curriculum builds the skills necessary to succeed in jobs related to networking computers and devices. This program will prepare students to sit for CompTIA Network+, CISCO Certified Entry Network Technician (CCENT), and CISCO CCNA.
Comprehensive Education Program for Multiple Education Levels

What you can expect:

Learn by doing.
Games, simulations, hands-on labs, and competitions—you won’t get bored, and you may find inspiration.

Extend your reach.
No matter what your interests are, these classes will add to your skill set. You don’t have to be a techie to succeed.

Join a community.
Connect online with like-minded Networking Academy students and instructors in 170 countries around the world.

Make a difference.
Here’s your chance to build expertise needed to solve global social problems.

Equalize your opportunity.
Women are finding a rapid path to leadership in technology fields.

Cisco certification levels offer a variety of career pathways.

Advancing certification can result in higher salaries.

Students can earn Cisco certifications that are highly valued by the ICT industry around the world.
