To Whom It May Concern,

Muskegon Community College (MCC) has been a great asset to the County of Muskegon's first responder groups and volunteer organizations. They have cooperated with fire, law enforcement, and medical to create safety exercises to prepare themselves and the community for emergencies and disasters. They have also given space to our volunteer organizations at no cost to hold trainings (Incident Command System and Skywarn are two examples). They also include the volunteer groups in their daily operations, i.e. using Citizen Corp to check people in at large events and using R.A.C.E.S. to create better radio communications amongst their staff.

MCC has provided their entire facility to our first responder and volunteer groups to create the largest lockdown drill and full scale Active Shooter exercise to occur within the County of Muskegon.

MCC also provides top notch education to our community at a reduced price and will continue to teach our community to prepare and respond to any type of disaster or emergency well into the future.

Sgt. Dan Stout II
Emergency Management Coordinator
Muskegon County
