Data Source

The information contained in this report originates from student enrollment data submitted to the National Student Clearinghouse (the Clearinghouse). For more information about the Clearinghouse, please visit <http://www.nationalstudentclearinghouse.com>.

Student Cohorts

Student cohorts in this report are defined as credential-seeking students, both full-time and part-time, who first enrolled at an ATD college in the fall semester. For example, the Fall 2019 cohort students are those who first enrolled at an ATD college between August 1, 2019 and September 30, 2019.

Due to the limitation that the degree-seeking indicator in the Clearinghouse data file is not consistently populated by colleges, ATD uses a proxy to define students' degree-seeking behavior through their enrollment history, which is also in alignment with the approach adopted by American Association of Community College's Voluntary Framework of Accountability (AACC's VFA). AACC defines degree-seeking as completing 12 credits in the first two years after initial enrollment. Accordingly, ATD includes students who completed 15 FTE weeks of enrollment (approximately 12 credit hours) in their first two years of enrollment (8 FTE weeks in the first year for the most recent cohort). For more details, please refer to "Weeks of Full-Time Equivalent (FTE) Enrollment" (below).

Detailed outcome information for five- and seven-year completion is not included in this report. With four-, six-, and eight-year completion metrics already provided for multiple cohorts, these additional completion times are not critical to understanding overall trends.

Top 3 Student Race/Ethnicity Groups

Outcome comparisons are provided for the three race/ethnicity groups with the largest student populations, as calculated from the subpopulation of students with known race/ethnicity in the most recent cohort (i.e., Fall 2019). Please note that these groups are ordered from largest to smallest in size in the report.

Persistence Fall-to-Spring

The student persisted at the home institution from the fall semester of first enrollment to the following spring semester, defined as either (a) having an enrollment record with at least one day of enrollment in the spring semester (January 1 to May 15) of the following calendar year, or (b) having completed a credential by that time.

Persistence Fall-to-Fall

The student persisted at the home institution from the fall semester of first enrollment to the following fall semester, defined as either (a) having an enrollment record with at least one day of enrollment in the fall semester (August 1 to December 31) in the following year, or (b) having completed a credential by that time.

Weeks of Full-Time Equivalent (FTE) Enrollment

The National Student Clearinghouse currently does not **universally** collect credit information (e.g., number of credits completed each semester) in the student enrollment data. Although institutions participating in the Clearinghouse's Postsecondary Data Partnership (PDP) do report course credit information, not all ATD institutions participate, so this information cannot be used consistently across the network at this time. Based on the number of days of enrollment and student participation status, the Clearinghouse reports weeks of FTE enrollment. This measure is used as a proxy for course credits in this report.

Weeks of FTE enrollment is calculated by the number of days of enrollment (D) weighted by student's participation status (S) in a given period of time: $(D \times S) / 7$, where D equals a number of days a record spans (calculated as the difference between term begin date and term end date), and S equals a factor representing the enrollment status:

- Full Time (F) = 1.00
- Three Quarter Time (Q) = 0.75
- Half Time (H) = 0.50
- Less Than Half Time (L) = 0.25

The F, Q, H, and L statuses are indicated by the colleges as they submit student enrollment data to the Clearinghouse

At most community colleges, a semester is approximately 15 weeks and 12 credits are required for full-time enrollment. AACC's VFA defines degree-seeking students as those who have completed 12 credits in their first two years of enrollment. For the purpose of this report, degree-seeking is measured as completion of 15 weeks of FTE enrollment in the first two years after initial enrollment. For the most recent student cohort for which only one year of data is available, completion of 8 weeks of FTE enrollment in the first year is used as an indicator of degree-seeking.

Comparison to Prior Versions of the Report

This current version (2021) features cohorts and outcomes calculated in the same fashion as in the 2018 through 2020 versions, as confirmed by the Clearinghouse. You may notice minor variations in cohort sizes for older cohorts, due to the dynamic nature of NSC data collection. Outcomes and/or demographic information for these students can also change due to continuous updates of student information as submitted from institutions nationwide.

However, you will notice the largest difference in the Fall 2019 cohort. As of the 2021 report, students in this cohort only had a single year of outcomes available and degree-seeking was defined as having completed 8 weeks of FTE enrollment in one year. With an additional year of outcomes now present, degree-seeking for this cohort is now calculated as 15 weeks of FTE enrollment in two years. This updated information will naturally yield an updated cohort size.

Home

The ATD institution associated with a student as the place of enrollment at the time of cohort assignment—the institution named on the cover of this report. This term is used throughout the report alongside completion to indicate an activity that took place at this “original” institution.

Completion

The student received a certificate, associate’s degree, or any other credential/award by the end of the specified reporting period (on or before August 14th of the reporting period). The credential reflects one received at the home institution unless otherwise specified in the category name (e.g., Associate/Certificate Completion at Transfer Institution).

Transfer

The student had at least one enrollment record at a four-year institution or two-year institution other than the originating institution by the end of the reporting period.

Still Enrolled

The student had at least one day of enrollment at a postsecondary institution in the last year of the reporting period.

Dropped Out

The student had not completed a credential or transferred to another institution, and had no enrollment record at any institution in the last year of the reporting period.

Disaggregated Data

This report presents student outcome data disaggregated by gender, race/ethnicity, age group, and FTEIC status. Data are not disaggregated by Pell status, remedial course enrollment, veteran status, or citizenship status due to the extremely low submission rate of those indicators.

Disaggregated data by race/ethnicity are not presented if less than 50% of a student cohort’s race/ethnicity is reported (40% for cohorts prior to Fall 2012).

First-Time-Ever-in-College (FTEIC)

The student has no higher education history prior to the first fall enrollment reported in this report. Students who enter only with dual enrollment credit are also included in this category.

ATD Benchmark

ATD benchmarks are calculated as the average outcomes of all cohort students enrolled at ATD network colleges in the dataset.

State/Regional Benchmark

State benchmarks are calculated as the average outcomes of all ATD colleges in the state where the reporting ATD college is located. If there are fewer than five ATD colleges in the state, a regional benchmark is provided.

ATD follows the region assignment by the U.S. Department of Education:

New England: CT ME MA NH RI VT
Mid East: DE DC MD NJ NY PA
Great Lakes: IL IN MI OH WI
Plains: IA KS MN MO NE ND SD
Southeast: AL AR FL GA KY LA MS NC SC TN VA WV
Southwest: AZ NM OK TX
Rocky Mountains: CO ID MT UT WY
Far West: AK CA HI NV OR WA

In 2020-21, there were fewer than five ATD colleges in the Rocky Mountains region with consistent historical completion information. Therefore, colleges in this region are included with Plains for benchmarking purposes.

Additional Data on Student Status

More detailed student completion and transfer data are presented in the table below, for colleges that are interested in regrouping such data.

	Three Years After Enrollment		Four Years After Enrollment
