

INTERNAL AUDITOR TRAINING

ISO 9001:2015 and IATF 16949:2016

Attendees will learn:

- Definition of a process
- How to identify the processes at your organization
- How to perform a 'Process' audit
- How to ensure I perform process audits and still cover each requirement of the standards
- The components of a valid audit deficiency
- How to ensure effective corrective action results from our internal audits
- How to ensure that you are prepared for third party audits

Training sessions available:

- Mar. 26-28 2018
- Jun. 20-22 2018
- Oct. 3-5 2018

CLASS TIME: 8:00am-4:30pm
 LOCATION: MCC's Stevenson Center -
 Room 1228
 221 South Quarterline Road

ISO 9001:2015 and IATF 16949:2016 Internal Auditor

This one-day add on training class is intended to prepare selected individuals to perform internal audits of the quality assurance system. It focuses on the IATF 16949:2016 standard and auditors will be trained to evaluate their organization's system for compliance. Participants will learn the skills and protocols necessary to carry out a formal assessment of the quality management system based on the presence of objective evidence.

COST: \$749 per person for the 3 days training, includes continental breakfast and lunch. If 3 or more attendees register from the same company, the cost will be \$700 per person.

ISO9001:2015 Internal Auditor

Learn how to conduct internal audits that are effective and efficient. Focus will be given to the requirements of the ISO9001-2015 standard and how to audit to ensure compliance of your organization. This class is a mixture of teaching on the requirements in the standard and practical exercises that will give actual auditing experience.

COST: \$595 per person for the 2 days training, includes continental breakfast and lunch. If 3 or more attendees register from the same company, the cost will be \$550 per person.

Kathy Hoath, of Superior Systems Management, has worked with over 150 companies in the development of the quality (business) systems. She has also done extensive training in calibration, metrology, blueprint reading, problem solving, team building, leadership and continuous improvement. Kathy has owned her own company since 1990, and is very dedicated to ensuring that the companies she works with increase their profit margins and meet their defined goals during improvement projects. Kathy has brought two of her own companies to ISO9000 registration and increased her profits as a result of each registration. She has more than 30 years of manufacturing experience and is an IRCA Certified Lead Assessor. She is proficient in management systems for ISO9001, AS9100, IATF-16949, ISO/IEC 17025 and ISO14000.
