* BIOL 252 L&L and chemistry competency are optional for individuals who plan to exit at the completion of Level 1; must be completed prior to Semester 5 if pursuing AAS Degree.

- Courses in the Nursing Curriculum (NUR or AH) must be completed in sequence with a “C+” (2.3) or above to progress in the Nursing Program. Non-nursing courses may be completed with a C (2.0) or above prior to entry into the Nursing Program sequence.
- Students must make an appointment with the MCC Counseling and Advising Center (231-777-0362) to review requirements, to develop a course plan, and to receive a Nursing Program application. See Requirement Checklist for Wait List Requirements.
- If testing/coursework is over eight years old, competency must be validated on established examinations or by repeating the course.
- General education courses must be completed with a “C” (2.0) or above in adherence to the Muskegon Community College Course Repeat Rule, which was developed to provide fair access to classes. It allows the student to repeat the course once. Instructor permission is required to take a course more than twice. To repeat a course, a student must register for and pay all necessary fees. Each grade received will appear on a student’s record, but only the last grade awarded is used in computing a GPA. Keep in mind that if you retake a class and receive a lower grade, the last grade is still the one that counts. When transferring to another college or university, you may be held accountable for all attempts as grades associated with a course taken at Muskegon Community College.
